

Fonken167dtb 1v1.02 for FE167eN

© 2007-2012 planet_10 enterprises limited
designed & drawn by D Dlugos | 03 - jan -2012
for non-commercial use only

Notes 1:

- 0/ Designed for FE167eN, will work well with stock driver
- 1/ All panels 18mm thick (quality multi-ply recommended)
- 2/ Vents are full height by 15mm wide
- 3/ all surfaces lined with 1/2" cotton or wool felt, do not obscure entrance to vents

The fit of the brace should be determined in the field... the brace should be tight against the magnet of the driver, but not so much that it stresses the basket... small paper shims can be used if necessary.

Brace should be 30-40% holes
