

Notes:

0/ designed for modified Fostex FE127e, will work well with srock driver

1/ target volume 13 liters = 793in<sup>3</sup>

2/ All panels 1/2" thick baffle is 3/4" (or adjust for 2x 1/2")

3/ Ports are ~ 3" (75mm) long by 3/8" (9.5mm) thick - 3 per side with 4 - 1 1/32" (26.4mm) solid spacers

4/ brace shape is only suggestive -- prime purpose is to brace speaker, it needs to be about 35-40% holes. (ie if you have to mount a terminal cup in the middle, you'll want to make sure the brace allows clearance)

5/ Don't forget to angle cut the back of the driver cut-out to give it breathing room

6/ All internal panels lined with ~1/2" (12mm) wool felt (preferred), 3/4" (19mm) poly-fluff batting, or 1" (25mm) fiberglass Note that it is hard to get into the box after it is sealed up

FE127e Fonken v1.0.1a
